NOTICE: Section 2536 of title 10, United States Code, prohibits the award of a contract under a national security program to an entity controlled by a foreign government if it is necessary for that entity to be given access to information in a proscribed category of information in order to perform the contract unless a waiver is granted by the Secretary of Energy. In addition, a Facility Clearance and FOCI information are required when the contract or subcontract to be awarded is expected to require employees to have access authorizations.

NOTICE: Offerors who have either a Department of Defense or a Department of Energy Facility Clearance generally need not resubmit the following foreign ownership information unless specifically requested to do so. Instead, provide your DOE Facility Clearance code or your DoD assigned commercial and government entity (CAGE) code. If uncertain, consult the office which issued this solicitation.

(a) Use of Certificate Pertaining to Foreign Interests, Standard Form 328. (1) The contract work anticipated by this solicitation will require access to classified information or special nuclear material. Such access will require a Facility Clearance for the Seller organization and access authorizations (security clearances) for Seller personnel working with the classified information or special nuclear material. To obtain a Facility Clearance the Offeror must submit a Certificate Pertaining to Foreign Interests, Standard Form 328, and all required supporting documents to form a complete Foreign Ownership, Control or Influence Package. Standard Form 328 and supporting documents are submitted to the Company electronically through the FOCI Electronic Submission and Processing System (e-FOCI). Access to the e-FOCI system will be provided by the Company to the Offeror as necessary for submission of Standard Form 328 and supporting documents.

(2) Information submitted by the Offeror in response to the Standard Form 328 will be used solely for the purpose of evaluating foreign ownership, control or influence and will be treated by DOE, to the extent permitted by law, as business or financial information submitted in confidence.

(3) Following submission of a Standard Form 328 and prior to contract award, the Seller shall immediately submit to the Company written notification of any changes in the extent and nature of FOCI which could affect the Offeror’s answers to the questions in Standard Form 328. Following award of a contract, the Seller must immediately submit to the cognizant security office written notification of any changes in the extent and nature of FOCI which could affect the Offeror’s answers to the questions in Standard Form 328. Notice of changes in ownership or control which are required to be reported to the Securities and Exchange Commission, the Federal Trade Commission, or the Department of Justice must also be furnished concurrently to the cognizant security office.

(b) Definitions. (1) Foreign Interest means any of the following: (A) A foreign government, foreign government agency, or representative of a foreign government; (B) Any form of business enterprise or legal entity organized, chartered or incorporated under the laws of any country other than the United States or its possessions and trust territories; and (C) Any person who is not a citizen or national of the United States.

(2) Foreign Ownership, Control, or Influence (FOCI) means the situation where the degree of ownership, control, or influence over a contractor by a foreign interest is such that a reasonable basis exists for concluding that compromise of classified information or special nuclear material may result.

(c) Facility Clearance means an administrative determination that a facility is eligible to access, produce, use or store classified information, or special nuclear material. A Facility Clearance is based upon a determination that satisfactory safeguards and security measures are carried out for the activities being performed at the facility. It is DOE policy that all contractors and subcontractors requiring access authorizations be processed for a Facility Clearance at the level appropriate to the activities being performed under the contract. Approval for a Facility Clearance shall be based upon:

(1) A favorable foreign ownership, control, or influence (FOCI) determination based upon the Seller’s response to the ten questions in Standard Form 328 and any required, supporting data provided by the Seller;

(2) A contract or proposed contract containing the appropriate security clauses;

(3) Approved safeguards and security plans which describe protective measures appropriate to the activities being performed at the facility;

(4) An established Reporting Identification Symbol code for the Nuclear Materials Management and Safeguards Reporting System if access to nuclear materials is involved;

(5) A survey conducted no more than 6 months before the Facility Clearance date, with a composite facility rating of satisfactory, if the facility is to possess classified matter or special nuclear material at its location;

(6) Appointment of a Facility Security Officer, who must possess or be in the process of obtaining an access authorization equivalent to the Facility Clearance; and, if applicable, appointment of a Materials Control and Accountability Representative; and

(7) Access authorizations for key management personnel who will be determined on a case-by-case basis, and must possess or be in the process of obtaining access authorizations equivalent to the level of the Facility Clearance.

(d) A Facility Clearance is required prior to the award of a contract requiring access to classified information and the granting of any access authorizations under a contract. Prior to award of a contract, the DOE must determine that award of
the contract to the Offeror will not pose an undue risk to the common defense and security as a result of its access to classified information or special nuclear material in the performance of the contract. The Company or DOE may require the Offeror to submit such additional information as deemed pertinent to this determination.

(e) A Facility Clearance is required even for contracts that do not require the contractor’s corporate offices to receive, process, reproduce, store, transmit, or handle classified information or special nuclear material, but which require DOE access authorizations for the contractor’s employees to perform work at a DOE location. This type facility is identified as a non-possessing facility.

(f) Except as otherwise authorized in writing by the Company, the provisions of any resulting contract must require that the Seller insert provisions similar to the foregoing in all subcontracts and purchase orders. Any subcontractors requiring access authorizations for access to classified information or special nuclear material must submit Standard Form 328, Certificate Pertaining to Foreign Interests, and supporting documents, to the Company electronically through the e-FOCI system. Access to the e-FOCI system will be provided by the Company to subcontractors as necessary for submission of Standard Form 328 and supporting documents.
