ABSTRACT

Information on unclassified conference proceedings in the Document Collection Section of the Central Research Library is made available by a Keyword-in-Context (KWIC) Index. Conference location and date(s) have been appended to the titles in order to provide additional key words. A Bibliographical Section and a Report Number Section, cross referencing the different numbers assigned the same report, are also supplied.

ORNL-TM-2063, Pt. B is a classified report and covers the classified and unclassified but limited proceedings. Both parts cover the period January 1960 - June 1967.

INTRODUCTION

Access to information on unclassified conference proceedings held in the Document Collection Section of the Central Research Library is provided by a Keyword-in-Context (KWIC) Index. The period covered is January 1960 - June 1967. ORNL-TM-2063, Pt. B, issued as a classified report, covers classified and unclassified but limited proceedings.

Section I is an alphabetical listing of key words from the titles whereby the subject, location, date, or series number may serve to locate a particular conference. Each line carries an assigned number which corresponds to the complete bibliographical listing in Section II. The number is a combination of year - month - accession number. Example: 60-01-0001.

Section II is a bibliography listed by year and month. In addition to the complete title, given in English, the following information is available:

- Corporate Author and/or Sponsor(s)
- Location and Date of Conference
- The number by which the report is carried in the Document Section, and any known additional numbers which may have been assigned by various agencies.
- Language of the text, if other than English
- Proceedings in the Document Collection that do not carry a known identifiable report number
- The fact that no formal proceedings were issued

- The different numbers that may have been assigned a multi-volumed conference, or the fact that a volume may carry a different classification designation
- Miscellaneous papers available, either before the proceedings were published or, in some cases, in lieu of complete publication
- Availability of additional copies in the Circulation and Reference Section of the Library. No attempt was made to incorporate the extensive collection of conference proceedings cataloged in the book collection of the Circulation and Reference Section, but when a copy was known to be in both book and report collections, this information was added.

Section III is an alpha-numerical listing of all known numbers applying to the conferences in Section II along with the identifying accession number.
