Cyclotron Operations

A malfunctioning of one of three current limiters in the oscillator system was the cause of having to operate the cyclotron at a reduced beam current. The rectifiers in cubicle 94 in the oscillator system had to be replaced.

FISSION PRODUCTS

Krypton-85 Enrichment Facility (*R. W. Schaich*)

The ^{85}Kr enrichment columns were operative during the month of July, and all systems were functioning according to design. The south bank of three columns are scheduled to be unloaded during September, 1977. Expected yield on one of these columns should be >20% enrichment in ^{85}Kr .

Cesium-137 Pilot Production (*R. W. Schaich*)
(Production and Inventory Accounts)

1. Process Status

A Hanford WESF capsule containing approximately 70,000 curies of $^{137}\text{CsCl}$ was processed this month for J. L. Shepherd & Associates. A total of 66,450 curies was recovered by the purification procedure and the product was considered excellent material for ^{137}Cs source fabrication.
