## MELCOT: Methodology for Estimating the Life of Conductor-Connector Systems Operating at High Temperatures

This technology predicts the service life of conductor-connector systems.

Developed By  
Oak Ridge National Laboratory  
EPRI & TVA

Sponsored by  
EPRI and  
U.S. Department of Energy's  
Office of Electricity

Recipients left to right:  
Joe Graziano, Tom King,  
Edgar Lara-Curzio, and  
Jy-An John Wang
