High-Performance, High-Tc Superconducting Wires Enabled via Self-assembly of Non-superconducting Columnar Defects

A measurement system for noninvasive high-resolution surface and subsurface characterization and analysis of materials at the nanoscale.

Developed by and jointly submitted by SuperPower Inc., University of Houston, University of Tennessee, Oak Ridge National Laboratory, and Chonbuk National University.

Sponsored by Oak Ridge National Laboratory and the U.S. Department of Energy's Office of Electricity Delivery and Energy Reliability
