

Award Winner

Liquid Microjunction Surface Sampling Probe for Mass Spectrometry

Surface sampling probe employing liquid extraction delivers superior sensitivity and selectivity when coupled to mass spectrometry.

Developed and jointly submitted by Oak Ridge National Laboratory and NextGen Services.

Sponsored by The U.S. Department of Energy's Office of Basic Energy Sciences, Oak Ridge National Laboratory, UT-Battelle and MDS Sciex.

Recipients from left to right:
Gary J. Van Berkel and Vilmos Kertesz.
Team members not pictured: Michael J. Ford
