

Knoxville News Sentinel (excerpt) - August 11, 2010

Former Vice President Al Gore visited Oak Ridge National Laboratory on Tuesday and reportedly looked at a number of lab technologies for potential investment. Gore is a partner with the venture capital firm Kleiner, Perkins, Caufield & Byers, which has invested significantly in green technologies.

ORNL Researchers, Dr. Gerard Ludtka and Dr. Gail Ludtka with the Materials Processing Group (MPG), explain the transformational and game-changing impacts that high-magnetic and thermo-magnetic field processing have for the next generation structural and functional materials with superior performance to Al Gore during his August 10, 2010 visit to ORNL.

Al Gore prepares to drop a magnetic ball down a copper tube to witness the interaction of magnetic fields with a non ferrous material.
